

# THE SOFT AND SHIMMERING FALL WINTER COLLECTION 2019

BY D.EXTERIOR

There is a certain excitement surrounding every fashion show during Milan Fashion Week, but the fervor surrounding the D.EXTERIOR Show was at a fever pitch. The air vibrated with anticipation and designer Nadia Zanola did not disappoint. Of the 58 runway shows on the #MFW FW 19/20 schedule, this was my absolute favorite

Tailoring and creativity come together in D. Exterior's Fall Winter 19/20 collection which is marked by metallic gleams, a sophisticated palette and precious materials. The collection presents soft, sophisticated colors and bright tones, alternating with monochromatic looks.

The silver and golden surfaces reflect light effects that enhance the richness of the fabrics: embossed silk multilayers, pleats in silk, and organza give life to a refined elegance in each piece.

The careful choice of materials enriches sportswear practicality as well as adding a sense of refinement. Details and decorations flow into a dance creating a soft embrace between traditional and modern.
